Search It:

Durable links (permalinks) for the sources that have records in Search It

1. Click on “Access Options,” “Details,” “Availability and Request Options,” or any other tab at that location
2. Click on “Actions”
3. Click on “Permalink”
4. Cut and paste the link where you need it
Other Article Databases:

The databases are available from the Find Journal Articles page [http://www.libraries.wsu.edu/find-articles](http://www.libraries.wsu.edu/find-articles). You can go to “Databases A to Z” if you know the name of the database you want, or you can click on “Databases by Subject” to browse sets of databases organized by disciplinary category.

Note that some databases have special permalink features. Here is an example from Academic Search Complete:
Even if your database does not have special permalink features, you can form durable links to articles within the databases by following these steps:

1. While you are on a WSU Campus, copy the URL of your resource
2. Paste the URL in Notepad, or some other word processing application
3. Add this script AT THE BEGINNING of the URL you copied from the database: http://www.systems.wsu.edu/scripts/WSUAll.pl?
4. Cut and paste the link where you need it

Market Sees That Junk Bonds Are, Well, Junk

Letters

To the Editor:

In "The Perils of Bashing Junk Bonds" (May 13), you and your colleagues deplore the notion that junk bonds are junk. You argue that junk bond investors are not sophisticated and that junk bonds are not suitable for investment. However, I must disagree with your argument.

Junk bonds are not suitable for investment. They are issued by firms with poor credit ratings and are therefore considered to be risky. The risk of default is high, and the returns are not as attractive as those from other types of bonds.

Worse yet, Mr. Wigmore found that the market values of junk bonds are determined by supply and demand, and that the prices of junk bonds are subject to wide fluctuations. The potential for losses is high, and the risk of default is real.

In conclusion, I believe that junk bonds are not suitable for investment. They are not a good risk for the money you have invested. I urge you to reconsider your position on junk bonds and to take a more conservative approach to your investments.

Sincerely,

Market Sees That Junk Bonds Are, Well, Junk

In my view, the junk bond market is now correct not because of the disappearance of Mr. Milken but rather because the marketplace has finally recognized that junk bonds are now more important to do as if Dowell but never appeared on the scene. The notion that emerging businesses can find financing only by issuing new, unsecured bonds and other high-yield securities is simply not due.
